Bio

Roxanne is a nursing graduate from the University of Virginia who spent most of her career caring for critically ill patients.

Her passion for writing started early in life and she wove it into her leadership roles in healthcare.

After her divorce, Roxanne, like so many single mothers found creative ways to make ends meet. Already working two nursing jobs, she started writing for local media and blog editorials. And her desire to be an author reemerged.

Today, Roxanne's debut novel, [They Can't Eat You for Supper](#), is receiving high praise from readers. She remains dedicated to supporting the Family Court Reform effort and is a regular contributor to parenting blogs.

AUTHOR

If Big Little Lies, met Fried Green Tomatoes-

Two children. Two states. One mother's attempt to restore her world.

Kristin Murphy doesn't like change. Ten years after her divorce, she feels whole again. Her farmhouse isn't the mansion she walked away from, but it grounds her young family like roots through red clay. Generations of bitter divorcées ended with her, as she models the mother she always wanted. It's the makings of a blended family success story.

Until she's blindsided.

The fog lifts after a well-orchestrated custody coup d'état and change stands on Kristin's doorstep, cloaked in fear. What's certain is two girls now live in a tropical utopia hundreds of miles away from their mother.

She never imagined fighting to remain relevant in the legacy she created, but she's here now.

How will she fit into the new hierarchy as a mother without custody? How long can she stave off a past she vowed to bury?
